

Recall Summary – European Toys

EU Safety Gate Alerts (Mar 2025)

Alert No.	Notifying Country	Product	Product Photo	Hazard / Risk	Measures Adopted
OR/00043/25	Sweden	Headband (Country of Origin: China)		Environment The solders in the product have an excessive concentration of lead (measured value up to 55% by weight). Lead poses a risk to the environment. The product does not comply with the requirements of the Directive on the restriction of the use of certain hazardous substances in electrical and electronic equipment (RoHS 2 Directive).	Import rejected at border
OR/00044/25	France	Soft toy (Country of Origin: China)		Choking, Suffocation The plastic bag of the packaging is too thin. If a child plays with the packaging, the plastic could cover their mouth and nose, causing a risk of suffocation. Moreover, the seams are defective, making the filling accessible. Ingestion of the filling may cause choking. The product does not comply with the requirements of the Toy Safety Directive nor with the European standard EN 71-1.	Stop of sales
OR/00045/25	France	Soft toy (Country of Origin: China)		Choking The fibrous stuffing material of the toy is easily accessible due to the weakness of certain seams. A small child may put the filling material in their mouth and choke. The product does not comply with the requirements of the Toy Safety Directive nor with the European standard EN 71-1.	Recall of the product from end users

SR/00798/25	France	Fancy-dress mask (Country of Origin: China)		Chemical, Injuries Due to the placement of the metal bars in the mask, they can enter a child's eye and cause eye injuries. Moreover, the migration of chromium VI from the toy is too high (measured value up to 1488 mg/kg). Chromium (VI) is sensitising, can trigger allergic reactions and can cause cancer. The product does not comply with the requirements of the Toy Safety Directive nor with the European standard EN 71-3 and EN 71-1.	Recall of the product from end users
SR/00806/25	France	Chopsticks (Country of Origin: China)		Choking The toy has small parts (figure's hands) that can easily detach. A small child may put it in their mouth and choke. The product does not comply with the requirements of the Toy Safety Directive nor with the European standard EN 71-1.	Withdrawal of the product from the market
SR/00831/25	Germany	Soft ball (Country of Origin: Italy)		Chemical The ball material contains amine 2,4-Toluenediamine (measured concentration up to 428 mg/kg by weight). When the product is in direct and prolonged contact with the skin, it may be absorbed by the skin. Aromatic amines can cause cancer, cell mutations and affect reproduction. The product does not comply with the requirements of the Toy Safety Directive.	Stop of sales
SR/00840/25	Germany	Magnet toy (Country of Origin: China)		Injuries The toy contains small magnets with a high magnetic flux (measured value up to 398 kG ² mm ²). If a child swallows the small magnets, they could attract one another causing intestinal blockage or perforation. The product does not comply with the requirements of the Toy Safety Directive nor with the European standard EN 71-1.	Withdrawal of the product from the market

SR/00843/25	Germany	Soother holder (Country of Origin: China)		Strangulation The product bears a too long cord that can become trapped during various activities of a child, leading to strangulation. The product does not comply with the General Product Safety Regulation nor with the European standard EN 12586.	Recall of the product from end users
SR/00844/25	Germany	Soother holder (Country of Origin: China)		Strangulation The cord of the soother holder is too long. It can become trapped during various activities of a child, leading to strangulation. The product does not comply with the General Product Safety Regulation nor with the European standard EN 12586.	Recall of the product from end users
SR/00847/25	Germany	Toy slime (Country of Origin: China)		Chemical The migration of boron from the toy slime is too high (measured value up to 1360 mg/kg). Ingestion or contact with an excessive quantity of boron may harm the health of children by damaging their reproductive system. The product does not comply with the requirements of the Toy Safety Directive nor with the European standard EN 71-3.	Import rejected at border
SR/00851/25	France	Bath toy (Country of Origin: China)		Choking The toy (frog) is too small. A small child may put them in their mouth and choke on them. The product does not comply with the requirements of the Toy Safety Directive nor with the European standard EN 71-1.	Withdrawal of the product from the market
SR/00857/25	UK	Toy slime (Country of Origin: China)		Chemical The migration of boron from the toy slime is too high (measured value up to 1.167 mg/kg). Ingestion or contact with an excessive quantity of boron may harm the health of children by damaging their reproductive system. The product does not comply with the requirements of the Toy Safety Directive.	Destruction of the product

SR/00861/25	UK	Party-themed toys (Country of Origin: China)		Chemical, Suffocation The plastic material of the product has an excessive concentration of bis(2-ethylhexyl) phthalate (DEHP) and dibutyl phthalate (DBP) (measured values up to 0.28% and 0.011% by weight, respectively). These phthalates may harm the health by causing possible damage to their reproductive system. The plastic bag of the packaging is too thin. If a child plays with the packaging, the plastic could cover their mouth and nose, causing a risk of suffocation. The product does not comply with the requirements of the Toy Safety Directive nor with the REACH Regulation.	Destruction of the product
SR/00863/25	Poland	Balloons (Country of Origin: China)		Chemical The rubber of the balloons releases an excessive amount of nitrosatable substances (NDMA) (measured total value up to 2.03 mg/kg). Nitrosamine may cause cancer through ingestion or dermal exposure. A child could be exposed to it when touching or putting the product in their mouth. The product does not comply with the requirements of the Toy Safety Directive nor with the European standard EN 71-12.	Warning consumers of the risks
SR/00864/25	UK	Soft doll (Country of Origin: Unknown)		Choking The toy has small parts that can easily detach. A young child may place the small part in their mouth, causing them to choke. The product does not comply with the requirements of the Toy Safety Directive nor with the European standard EN 71-1.	Withdrawal of the product from the market
SR/00871/25	Germany	Baby book (Country of Origin: China)		Choking The book has small parts (clothes pegs and wobbling eyes) which can easily detach. A small child could put them in their mouth and choke. The product does not comply with the requirements of the Toy Safety Directive nor with the European standard EN 71-1.	Recall of the product from end users

SR/00875/25	UK	Baby walker (Country of Origin: China)		Injuries The product can easily collapse if heavy weight is placed on the tray. This could cause injuries to the child and users. The product does not comply with the General Product Safety Regulation.	Removal of this product listing by the online marketplace
SR/00878/25	UK	Pushchair hammock (Country of Origin: Poland)		Injuries The product has no restraint or physical barrier to prevent the child from putting their limbs outside the hammock. The child can therefore fall or suffer injuries from touching the structure of the pushchair. The product does not comply with the General Safety Product Regulation.	Recall of the product from end users
SR/00879/25	UK	Baby carrier (Country of Origin: China)		Suffocation The product's retention function is not adequate. Moreover, the indications for the suitable age range are not correct. In case of a small child, which can't hold the head up, the head may drop forward while they face outward, and this can cause that the child is not able to breathe, causing the child to suffocate. The product does not comply with the General Product Safety Regulation.	Import rejected at border
SR/00895/25	UK	Veterinarian play set (Country of Origin: China)		Chemical, Choking, Suffocation The plastic material of the product has an excessive concentration of di-'isononyl' phthalate (DINP) (measured value up to 4.9% by weight). DINP may harm the health of children, causing possible damage to their reproductive system and liver. Moreover, the plush toy dog has small parts (eyes and nose) which can easily detach. A small child may put them in their mouth and choke. Additionally, the plastic of the packaging is too thin. If a child plays with the packaging, the plastic can cover their mouth and nose, causing the child to suffocate. The product does not comply with the requirements of the Toy Safety Directive, with the REACH Regulation, nor with the European standard EN 71-1.	Destruction of the product

SR/00899/25	Luxembourg	Bath toy (Country of Origin: China)		Chemical The product contains an excessive amount of di-2-ethylhexyl phthalate (DEHP) (measured value up to 0.15% by weight). This phthalate may harm the health of children, causing possible damage to their reproductive system. The product does not comply with the REACH Regulation.	Withdrawal of the product from the market
SR/00901/25	Luxembourg	Soother (Country of Origin: China)		Choking The product has small parts (teat) which may easily detach. A child may put it into their mouth and choke. The product does not comply with the General Product Safety Regulation nor with the European standard EN 1400.	Removal of this product listing by the online marketplace
SR/00903/25	Germany	Soother holder (Country of Origin: China)		Strangulation The product bears a too long cord that can become trapped during various activities of a child, leading to strangulation. The product does not comply with the General Product Safety Regulation nor with the European standard EN 12586.	Recall of the product from end users
SR/00905/25	Iceland	Highchair (Country of Origin: Italy)		Injuries The highchair is unstable when the backrest is in the most reclined position. The baby can fall from the chair and suffer an injury. The product does not comply with the General Product Safety Regulation nor with the European standard EN 14988.	Recall of the product from end users
SR/00916/25	UK	Drone (Country of Origin: China)		Chemical The plastic material of the USB cable has an excessive concentration of bis(2-ethylhexyl) phthalate (DEHP), diisobutyl phthalate (DIBP), dibutyl phthalate (DBP) and di-'isononyl' phthalate (DINP) (measured values up to 1.9%, 0.013%, 0.34% and 0.89% by weight, respectively). The product does not comply with the requirements of the Toy Safety Directive nor with the REACH Regulation.	Destruction of the product

SR/00922/25	Luxembourg	Soother (Country of Origin: China)		Choking The soother shield may easily break, creating small parts. A young child may choke. The product does not comply with the General Product Safety Regulation nor with the European standards EN 1400 and EN 12586.	Removal of this product listing by the online marketplace
SR/00931/25	Hungary	Toy slime (Country of Origin: China)		Chemical The migration of boron from the toy slime is too high (measured value up to 990 mg/kg). Ingestion or contact with an excessive quantity of boron may harm the health of children by damaging their reproductive system. The product does not comply with the requirements of the Toy Safety Directive nor with the European standard EN 71-3.	Ban on the marketing of the product and any accompanying measures
SR/00933/25	Hungary	Toy slime (Country of Origin: China)		Chemical The migration of boron from the toy slime is too high (measured value up to 670 mg/kg). Ingestion or contact with an excessive quantity of boron may harm the health of children by damaging their reproductive system. The product does not comply with the requirements of the Toy Safety Directive nor with the European standard EN 71-3.	Ban on the marketing of the product and any accompanying measures
SR/00969/25	UK	Experimental toy set (Country of Origin: United Kingdom)		Choking, Injuries The product contains water beads. The beads can be put into their mouth and swallowed by children. As the beads expand, it can cause fatal occlusion of the respiratory track or intestinal blockage. Moreover, the beads if swallowed in hydrated form, may block a young child's airway, leading to choking. The product does not comply with the requirements of the Toy Safety Directive nor with the European standard EN 71.	Warning consumers of the risks

SR/00582/25	Poland	Plastic ball (Country of Origin: China)		Chemical The plastic material of the toy contains an excessive amount of dibutyl phthalate (DBP) and diisobutyl phthalate (DIBP) (measured values up to 3.75% and 3.35% by weight, respectively). These phthalates may harm the health of children by causing possible damage to their reproductive system. The product does not comply with the REACH Regulation.	Destruction of the product
SR/00971/25	Finland	Climbing frame set (Country of Origin: Unknown)		Injuries The slide/ramp lacks a fixing mechanism and can come loose during use, posing a crushing risk or injuries to a child on or under it. The product does not comply with the requirements of the Toy Safety Directive nor with the European standard EN EN 71-8.	Stop of sales
SR/01002/25	Sweden	Plastic ball (Country of Origin: China)		Chemical The migration of lead from the toy is too high (measured value up to 0.35% by weight). Lead is harmful to children as it can lead to developmental neurotoxicity. It accumulates in the body and may also affect their future progeny when breast-fed or unborn. Moreover, the plastic material of the plastic balls has an excessive concentration of bis(2-ethylhexyl) phthalate (DEHP) (measured value up to 7.6% by weight). DEHP may harm the health by causing possible damage to their reproductive system. The product does not comply with the requirements of the Toy Safety Directive nor with the REACH Regulation and the European standard EN 71-3.	Withdrawal of the product from the market
SR/01009/25	Italy	Toy slime (Country of Origin: China)		Chemical The migration of boron from the toy slime is too high (measured value up to 620 mg/kg). Ingestion or contact with an excessive quantity of boron may harm the health of children by damaging their reproductive system. The product does not comply with the requirements of the Toy Safety Directive nor with European standard EN 71-3.	Ban on the marketing of the product and any accompanying measures

SR/01010/25	Italy	Toy slime (Country of Origin: Italy)		Chemical The migration of boron from the toy slime is too high (measured value up to 1100 mg/kg). Ingestion or contact with an excessive quantity of boron may harm the health of children by damaging their reproductive system. The product does not comply with the requirements of the Toy Safety Directive nor with European standard EN 71-3.	Ban on the marketing of the product and any accompanying measures
SR/01018/25	France	Children's fancy-dress costume (Country of Origin: China)		Chemical The migration of chromium VI from the toy is too high (measured value up to 0,204 mg/kg). Chromium (VI) is sensitising, can trigger allergic reactions and can cause cancer. The product does not comply with the requirements of the Toy Safety Directive nor with the European standard EN 71-3 and EN 71-1.	Ban on the marketing of the product and any accompanying measures
SR/01021/25	Cyprus	Plastic doll (Country of Origin: China)		Chemical The plastic material of the product has an excessive concentration of bis(2-ethylhexyl) phthalate (DEHP) (measured value up to 23% by weight). This phthalate may harm the health of children, causing possible damage to their reproductive system. The product does not comply with the REACH Regulation.	Withdrawal of the product from the market
SR/01028/25	France	Bouncing balls (Country of Origin: China)		Damage to sight The LED light is too strong. Direct viewing of the light could cause damage to sight. The product does not comply with the requirements of the Toy Safety Directive nor with the European standard EN 62115.	Recall of the product from end users
SR/01041/25	Poland	Tricycle (Country of Origin: China)		Cuts, Injuries, Suffocation The sharp edges at the saddle stem can cause cuts. Moreover, inadequate distances between the moving parts of the wheels and frame can cause injuries in case of feet entrapment between moving parts. In addition, the plastic of the packaging is too thin. If a child plays with it, the plastic can cover their mouth and nose, causing the child to suffocate. The product does not comply with the requirements of the Toy Safety Directive nor with the European standard EN 71-1.	Warning consumers of the risks

SR/01046/25	Austria	Climbing frame (Country of Origin: China)		Strangulation The openings of the climbing frame are too large between rugs where a small child limb can pass but not his head. This can cause strangulation. The product does not comply with the requirements of the Toy Safety Directive nor with the European standard EN 71-1.	Removal of this product listing by the online marketplace
SR/01065/25	Ireland	Music toy set (Country of Origin: China)		Choking, Cuts The cymbals on the tambourine can become loose and dislodged, along with the accompanying small metal pins intended to secure them in place creating small parts. A child may place these small parts in their mouth and choke. The product does not comply with the requirements of the Toy Safety Directive nor with the European standard 71-1.	Warning consumers of the risks
SR/01066/25	France	Highlighter pens (Country of Origin: China)		Chemical The plastic material of the cupcake caps an excessive concentration of bis(2-ethylhexyl) phthalate (DEHP) and diisooctyl phthalate (DIOP) (measured value up to 35.12% by weight, combined). These phthalates may harm the health of children, possibly causing damage to their reproductive system. The product does not comply with the REACH Regulation.	Withdrawal of the product from the market
SR/01070/25	France	Soft toy (Country of Origin: China)		Choking The toy has small parts (eyes) that can easily detach. A small child may put them in their mouth and choke. The product does not comply with the requirements of the Toy Safety Directive nor with the European standard EN 71-1.	Recall of the product from end users
SR/01072/25	Luxembourg	Soother holder (Country of Origin: China)		Choking The beads of the soother holder do not have the required ventilation holes and the garment fastener easily breaks. Small children can put them in their mouth and choke. The product does not comply with the General Product Safety Regulation nor with the European standard EN 12586.	Withdrawal of the product from the market

SR/01084/25	Germany	Mounting kit for baby hammock (Country of Origin: Denmark)		Injuries The material and diameter of the plug sold in the fixing kit are not suitable for the baby hammock. This can cause the plug to break under continuous tensile stress and vibration, resulting in the mount failing to support the hammock and causing the baby to fall, thereby creating a risk of injury. The product does not comply with the General Product Safety Regulation.	Recall of the product from end users
SR/01088/25	France	Finger paint (Country of Origin: Germany)		Chemical The migration of aluminium from the toy is too high (measured value up to 560 mg/kg). Aluminium is toxic for children if ingested. The product does not comply with the requirements of the Toy Safety Directive nor with the European standard EN 71-3.	Withdrawal of the product from the market
SR/01090/25	Germany	Bouncing ball (Country of Origin: Germany)		Choking A child under 36 months could bite off small pieces of the product and swallow them, leading to choking. The product does not comply with the requirements of the Toy Safety Directive nor the European standard EN 71-1.	Destruction of the product
SR/01092/25	Finland	Slide ramp (Country of Origin: Finland)		Injuries The slide/ramp lacks a fixing mechanism and can come loose during use, posing a crushing risk or injuries to a child on or under it. The product does not comply with the requirements of the Toy Safety Directive nor with the European standard EN 71-8.	Manufacturer will send spare part to customers to prevent the risk
SR/01094/25	Norway	Toy rattle (Country of Origin: China)		Environment The solders of the product have an excessive concentration of lead (measured value up to 42% by weight). Lead poses a risk to the environment. The product does not comply with the requirements of the Directive on the restriction of the use of certain hazardous substances in electrical and electronic equipment (RoHS 2 Directive).	Withdrawal of the product from the market

SR/01099/25	Poland	Jumping rope (Country of Origin: China)		Chemical The toy contains an excessive amount of diisobutyl phthalate (DIBP) (measured value up to 18.4% by weight). DIBP may harm the health of children, possibly by causing damage to their reproductive system. The product does not comply with the REACH Regulation.	Withdrawal of the product from the market
SR/01101/25	Poland	Plastic toy (Country of Origin: China)		Choking The toy can break easily and generate small parts. A child may put them in their mouth and choke. The product does not comply with the requirements of the Toy Safety Directive nor with the European standard EN 71-1.	Warning consumers of the risks
SR/01113/25	Poland	Plastic toy (Country of Origin: China)		Choking, Injuries The toy has small parts (wings, chick, rear flap, metal axle, spring, wheels) which may easily detach. Furthermore, the shape and dimensions of the plastic eggs are inadequate. A child may put them into their mouth and choke. Moreover, the metal axis may become accessible, which may cause injuries. The product does not comply with the requirements of the Toy Safety Directive nor with the European standard EN 71-1.	Withdrawal of the product from the market
SR/01123/25	Poland	Plastic ball (Country of Origin: China)		Chemical The plastic material of the plastic ball has an excessive concentration of bis(2-ethylhexyl) phthalate (DEHP) (measured value up to 7.7% by weight). DEHP may harm the health of children by causing possible damage to their reproductive system. The product does not comply with the REACH Regulation.	Warning consumers of the risks
SR/01133/25	France	Toy train (Country of Origin: China)		Choking The product has small parts which may easily detach. A small child may put them into their mouth and choke. The product does not comply with the requirements of the Toy Safety Directive nor with the European standard EN 71-1.	Removal of this product listing by the online marketplace

Safety Gate: the EU rapid alert system for dangerous non-food products

“Safety Gate”, the EU rapid alert system (formerly known as “RAPEX”), enables the rapid exchange of information between **31 European countries** and the European Commission on non-food dangerous products found on the market posing a risk to the health and safety of consumers.

A weekly overview of the alerts on those products is published in English for free on <https://ec.europa.eu/safety-gate-alerts/screen/webReport#weeklyReports>. The measures taken in the notifying country in order to restrict such products’ marketing or use can be ordered by national authorities (“compulsory measures”) or be taken directly by producers and distributors (“voluntary measures”).

The official contact points of the Member and EFTA-EEA States provide the information published in these weekly overviews. Under the terms of Annex II.10 of the General Product Safety Directive (**2001/95/EC**) responsibility for the information provided lies with the notifying party. The Commission does not take any responsibility for the accuracy of the information provided.

Recall Summary – US Toys / Children’s Products

CPSC Recall List (Mar 2025)

Recall No.	Notifying Country	Product	Product Photo	Hazard / Risk	Remedy
25-160	USA	Nuby Stroller Fans (Country of Origin: China)		Laceration Injury Hazard Luv n' care Recalls Nuby Stroller Fans Due to Laceration Injury Hazard The stroller fan's housing allows consumers' fingers to contact the fan's blade, posing a laceration injury hazard to small children.	Consumers should stop using the stroller fan immediately and contact Luv n' care for information on how to return the product to obtain a free replacement. Luv n' care is contacting all known purchasers directly.
25-168	USA	Marie-Chantal Children's Nightgowns, Pajama Sets and Robes (Country of Origin: Peru and Portugal)		Burn Hazard Children's Nightgowns, Pajama Sets and Robes Recalled Due to Burn Hazard and Risk of Serious Injury or Death; Violation of Federal Flammability Standards; Imported by Marie-Chantal The recalled children's nightgowns, pajama sets and robes violate the federal flammability standards for children's sleepwear, posing a risk of serious burn injuries or death to children.	Consumers should immediately take the recalled children's garments away from children, stop using them and contact Marie-Chantal for a full refund. Consumers will be asked to destroy the garments by cutting them in half and disposing of them according to local and state recycling guidelines. Consumers should send a photo of the destroyed garment to recall@mariechantal.com to get the refund. Marie-Chantal is contacting all known purchasers directly.

25-170	USA	<p>Auto World Unassembled Deluxe Pit Kit Slot Cars</p> <p>(Country of Origin: China)</p>		<p>Ingestion Hazard</p> <p>Round 2 Recalls Auto World Unassembled Deluxe Pit Kit Slot Cars Due to Ingestion Hazard; Violation of Federal Regulations for Magnets</p> <p>The recalled unassembled Deluxe Pit Kit slot cars violate the mandatory federal regulation for magnets because the magnets used to power the car are loose prior to assembly, posing an ingestion hazard to children. Assembled models do not pose this risk and are therefore not subject to this recall.</p> <p>When high-powered magnets are swallowed, the ingested magnets can attract to each other, or another metal object, and become lodged in the digestive system. This can result in perforations, twisting and/or blockage of the intestines, infection, blood poisoning and death.</p>	<p>Consumers should keep the recalled, unassembled Deluxe Pit Kit slot cars away from children and contact Round 2 to receive a pre-paid label to return the recalled slot cars for a full refund. Round 2 is notifying all known purchasers directly.</p>
--------	-----	--	---	--	--

25-171	USA	Lolanta Children's Bathrobes (Country of Origin: China)		Burn Hazard Lolanta Children's Bathrobes Recalled Due to Burn Hazard and Violation of Flammability Regulations; Sold Exclusively on Amazon.com by Nanchang Zhongcangjishi E-commerce The recalled children's bathrobes violate federal flammability regulations for children's sleepwear, posing a risk of burn injuries and death to children.	Consumers should immediately stop using the recalled bathrobes, take them away from children, and contact Nanchang Zhongcangjishi E-commerce for a full refund. Consumers will be asked to destroy the garments by cutting them in half and emailing a photo of the destroyed garment to business@lolanta.com . Upon receipt of the photo, consumers will be issued a full refund of the purchase price. Amazon and Nanchang Zhongcangjishi E-commerce are contacting all known purchasers directly.
25-172	USA	Love Our Home Braided Crib Bumpers (Country of Origin: China)		Suffocation Hazard Love Our Home Braided Crib Bumpers Recalled Due to Risk of Serious Injury or Death from Suffocation Hazard; Violation of Federal Ban on Crib Bumpers; Sold Exclusively on Shein.com by Love Our Home The recalled crib bumpers violate the federal crib bumper ban, posing a deadly suffocation hazard to infants. Padded crib bumpers are banned by the federal Safe Sleep for Babies Act.	Consumers should immediately stop using and remove the recalled crib bumpers from the crib. To receive a full refund, consumers should cut the crib bumper in half, take a photo of it, and email the photo to loveourhomerecall@163.com . Love Our Home is contacting all known purchasers directly.

25-178	USA	Retractable Safety Gates (Country of Origin: China)		Entrapment Hazard Safety Gates Recalled Due to Risk of Serious Injury or Death to Children from Entrapment Hazard; Violation of Federal Regulation for Gates and Enclosures; Sold Exclusively on Amazon.com by HabiLife Direct The recalled gates violate the federal safety regulations for expansion gates and expandable enclosures because a child's torso can fit through the opening between the gate and the floor, posing a risk of serious injury or death due to entrapment hazard.	Consumers should stop using the recalled gates immediately and contact HabiLife Direct for a full refund. Consumers will be asked to destroy the gates by cutting the mesh and disposing of the gates. Consumers must send a photo of the destroyed gates to service@hblife.fans . HabiLife Direct and Amazon are contacting all known purchasers directly.
25-180	USA	Silicone Rosary and Decade teethers (Country of Origin: United States)		Choking Hazard Chews Life Recalls Silicone Rosary and Decade Teethers Due to Choking Hazard Part of the teether's safety snap clasp can detach, posing a choking hazard.	Consumers should immediately stop using the recalled teether and contact Chews Life to receive a free repair. Consumers will be provided with a prepaid shipping label to return the recalled teether to Chews Life. Chews Life will mail consumers the repaired teether at no charge.

25-182	USA	Onasti Toddler Tower Stools (Country of Origin: China)		Fall and Injury Hazards Onasti Toddler Tower Stools Recalled Due to Serious Fall and Injury Hazards; Sold Exclusively on Amazon.com by Blissful-Time The stools can collapse or tip over while in use, posing serious fall and injury hazards to children.	Consumers should stop using the recalled stools and store them away from children until repaired. Contact Blissful-Time to receive a free repair kit, including shipping. The repair kit consists of two steps, one base, and one guardrail. Blissful-Time is contacting all known purchasers directly.
25-197	USA	Cra-Z-Art Gemex/Gel2Gem Jewelry Kits (Country of Origin: China)		Violation of the Federal Hazardous Substances Act LaRose Industries Recalls Cra-Z-Art Gemex/Gel2Gem Jewelry Kits Due to Risk of Skin, Eye and Respiratory Irritation and Sensitization; Violation of the Federal Hazardous Substances Act The recalled jewelry-making kits contain a resin that, when liquid, can cause skin, eye and respiratory irritation or sensitization when inhaled, touched or ingested. The resin contains an acrylate (hydroxyethylmethacrylate "HEMA") in amounts prohibited in children's products by the Federal Hazardous Substances Act. Already created jewelry should be inspected to confirm it is fully cured. If there is liquid or any liquid residue present, the jewelry should not be worn and should be stored away from children. Once cured, the resin no longer presents the hazard.	Consumers should stop using the jewelry making kits immediately and contact LaRose Industries for a full refund. LaRose is contacting all known purchasers directly.

CPSC

The United States Consumer Product Safety Commission (CPSC) is an independent agency of the United States Government. To provide better service in alerting the American people to unsafe, hazardous or defective products, a “one stop shop” for U.S. Government recalls, <http://www.recalls.gov>, has been created. Members of the public may report unsafe products to CPSC by using the platform.

The recall list is divided into seven categories: Consumer Products, Motor Vehicles, Boats, Food, Medicine, Cosmetics and Environmental Products. Generally, the recall is conducted voluntarily by the company under CPSC's Fast Track Recall program. Fast Track recalls are initiated by firms who are committed to working with CPSC to quickly announce the recall and remedy to protect consumers.

Recall Summary – Australia Toys / Children’s Products

ACCC Recall List (Mar 2025)

PRA No.	Notifying Country	Product / Description	Product Photo	Hazard / Risk	Remedy
2025/20453	Australia	Rattle teether toy with assorted attachments including bear and pull strings.		Risk of Serious Injury or Death The product does not comply with the mandatory standard for toys for children up to and including 36 months of age. Risk of serious injury or death by choking or suffocation if a child detaches and places the small parts in their mouth.	Stop using the product immediately and place out of reach of children. Return the product to Little Infants Australia for a replacement or store credit. Contact: Little Infants Australia email: support@littleinfants.com.au call: 0416 037 693
2025/20456	Australia	Circular baby walker with plastic animals attached.		Risk of Serious Injury or Death The product does not comply with the mandatory safety standard for baby walkers. Risk of serious injury or death if the walker tips over and causes the baby to fall.	Stop using the product immediately and place out of reach of children. Return the product to Little Infants Australia for a replacement or store credit. Contact: Little Infants Australia email: support@littleinfants.com.au call: 0416 037 693

Australian Product Safety System

The Australian product safety system is set up to maximize the safety of goods through the cooperation of consumers, businesses and agencies. This policy sets out the principles adopted by the Australian Competition and Consumer Commission (ACCC) for prioritizing and addressing product safety risks.

Under the Australian Consumer Law, a responsible Minister can order a compulsory recall when there are hazards on the products. A voluntary recall could be conducted to remove the product from the marketplace when the suppliers become aware of unsafe or defective products.

The ACCC administers a national recalls system for recalls of specific and general consumer products, and publishes all product recalls on the website <https://www.productsafety.gov.au/recalls>.

STC (Hong Kong Standards and Testing Centre) is a not-for-profit, independent testing, inspection and certification organization. With a global network of ISO/IEC 17025 accredited testing laboratories and over 60 years of experience in consumer product testing, we can meet your conformity assessment needs with highly efficient and reliable service. Our testing scope and capabilities related to toys and children's products include but are not limited to:
