- Smart Toys
- Therapy Toys
- bby Goods
- Magic Items
- Blind Boxes
- Adult Toys

Potential Risks & Key Testing Areas

Mechanical & Physical Properties

Product surfaces must not contain sharp points or edges to prevent physical injuries.

Chemical Safety

Harmful chemicals (such as heavy metals, persistent organic pollutants and asbestos) can have toxic effects on human health, impair physiological functions and damage the organs, nervous system and immune system.

Explosivity & Flammability

Strictly guard against electrical leakage, abnormal temperature rise and spontaneous combustion in electrical products to reduce fire hazards.

Labelling & Instructions

Products must feature clear labels and provide safe-use instructions along with age recommendations in compliance with product-labelling regulations in each destination country.
